Dear Mr. Gates,

Thank you for raising these very important concerns to my attention. I also received your email dated July 18, 2013. I am working with the management in our Air Traffic Organization to get a better understanding of the situation. I invite you to come into our office to meet and discuss your concerns, as well as review the Safety Risk Management System process used at Torrance, I will have the Air Traffic experts in attendance at the meeting who are intimately involved with the air traffic and safety activities underway at the airport.

If you are amenable to such a meeting please advise and I will have Sandy Monge from my staff find a time on our schedules that works for both all us.

Please let me know.

Sincerely,

Dave Suomi
